Queenwood School for Girls selects Meru Networks for its new wireless LAN

Sydney, November 6 2009 – Queenwood School for Girls (Queenwood) in Mosman, NSW has chosen Meru Networks' 802.11n wireless local area network (LAN) to be implemented in its senior school campus.

The solution comprises 18 x 802.11 a/b/g/n access points, a Meru Networks' controller and ceiling mount antennas for the access points, which provides security and aesthetic benefits.

Queenwood is regarded as a leader in technology adoption in the educat ion space, providing students with smart classrooms - technology-rich rooms equipped with computers, data projectors, DVD and video players and touch sensitive interactive Smartboards.

The solution was ordered through Wavelink Communications' channel par tner ASI Solutions and will be installed in term four this year.

Jonathan Ordman, director, Wavelink Communications, said, "This deal further cements Meru Networks' position as a leader in 802.11n wireless LAN.

"It provides students with the very best in wireless access to enhance their learning experience."

Queenwood is planning to extend the solution to its other campuses in the future.

About Wavelink

Wavelink Communications (www.wavelink.com.au) specialises in the supply, marketing and support of a range of leading edge IP telephony and wireless solutions. Wavelink distributes a range of products from Polycom, Digium and Meru Networks.

About Meru Networks

Meru Networks develops and markets wi reless infrastructure solutions that enable the All - Wireless Enterprise.

Its industry-leading innovations deliver pervasive, wireless service fidelity for business - critical applications to major Fortune 500 enterprises, universities, healthcare organisat ions and local, state and federal government agencies.

NEWS FLASH

Meru's award-winning Air Traffic Control technology brings the benefits of the cellular world to the wireless LAN environment, and its WLAN System is the only solution on the market that delivers predictable bandwidth and over-the-air quality of service with the reliability, scalability and security necessary to deliver converged voice and data services over a single WLAN infrastructure.

Founded in 2002, Meru is based in Sunnyvale, Calif. For more i nformation, visit www.merunetworks.com.
