

Digium introduces first affordable HD touchscreen IP phone for business

Digium D80 IP phone for Asterisk and Switchvox offers advanced features, unparalleled value

February 9, 2017 — [Digium®, Inc.](http://www.digium.com), The Asterisk® Company, has introduced the industry's first affordable high definition touchscreen IP phone. The Digium D80 is poised to disrupt the status quo of high-cost, low-quality, touchscreen desk phones. With today's modern workforce demanding ease of use, intuitive interfaces, high levels of customisation and simplified workflows, Digium recognises the challenge of successfully meeting these needs while also creating a premium product that is affordable for any user. Designed to complement any environment, the D80 provides the advanced features required by even the most sophisticated, evolving businesses.

Unlike other touchscreen desk phones, the Digium D80 is completely touch-driven, utilising a large, 7-inch colour HD screen. It provides a fully-integrated experience, giving users an unparalleled level of functionality with simple, flexible and robust call handling. The D80 supports up to 100 Rapid Dial Keys / Busy Lamp Fields / Status Indicators and provides touchscreen access to advanced phone applications like visual voicemail, user presence, intelligent contacts and visual call parking.

"In the past, touchscreen phones were too expensive, putting them out of reach for most businesses. They simply replicated traditional multi-button phones and failed to introduce any new, innovative or intelligent features to take advantage of the touchscreen technology," said David Deaton, VP of Products, Digium. "The Digium D80 IP phone challenges that reality by making full use of the touchscreen interface. Rethinking the user interface by foregoing traditional physical buttons delivers a more intuitive experience and presents information in a more meaningful way. Most importantly, the D80 is priced within reach for every user, setting new expectations for today's modern business desk phone."

The flagship of Digium's IP phone family, the D80 offers simple setup and full integration with Asterisk, the world's most widely-adopted open source communication software, as well as Switchvox®, Digium's award-winning fully-featured Unified Communications (UC) solution. The D80's impressive capabilities are rounded out with support for wideband (HD) audio, electronic hook switch (EHS) headsets, and gigabit ethernet, making it the perfect complement to Digium's premium colour-screen IP phones.

The D80 is compatible with Switchvox version 6.3.5 and Asterisk with DPMA version 3.4, and will be available in March 2017, at a market-leading price of \$525 AUD ex GST, far less than most competitive touch-screen IP Phones.
