NOMADIX LEADS INDUSTRIES SERVING MOBILE, TRANSIENT INTERNET USERS BY SUPPLYING UNPRECEDENTED PRODUCTS AND SERVICES

New Software, New Customers Demonstrate Nomadix's Position As a Leader in Ensuring Tech-Savvy Travellers Have Fast, Reliable and Secure Access to the Internet

June 27, 2011 – Nomadix, Inc., the leading provider of network gateway devices, continues to demonstrate its role as the supplier of choice for technology in the industries serving mobile, transient users of the Internet by adding unprecedented products and service to a roster of topflight customers.

The company just released version 7.3 of its industry-leading NSE software that provides customers with critical security, speed and control enhancements that include Domain Name System Security Extensions, Destination HTTP Redirect, Real Time Processes, Home Page Redirect for HTTPS websites, and Volume-based RADIUS Re-Authentication.

Nomadix has made a renewed commitment to its customers through a series of business enhancements:

- The formation of a Customer Council that will be used for guidance on future product development.
- Optional software licensing agreement to further mitigate risk for the supply channel.
- A new customer beta program giving select customers access to cutting edge software as it is being developed.

The enhancements complement previous upgrades its customers are using to ensure technology-savvy travellers have fast and secure access to the Internet from their rooms and conference centres. "Our customers are reaping the benefit of the major investment we have made, and continue to make, in research and development," says Fred Reeder, chief commercial and operating officer of Nomadix.

Numerous new customers have chosen Nomadix including The Melbourne Convention Centre. "Nomadix has allowed us to provide our customer and its visitors with seamless and reliable access to the Internet they demand," said Ilan Rubin, CEO of Wavelink, whose company integrated the solution. "Nomadix products give us the flexibility and control we need to keep up with a rapidly evolving High Speed Internet Access technology environment."

About Nomadix
Nomadix offers gateways for seamless wired and wireless connectivity solutions across public access networks and enterprises. Powered by patented technology, Nomadix enables revenue generation and customization in a number of business models. With Nomadix, public access network providers are able to deploy cost-effective, secure and easy-to-use network services. Nomadix is a wholly owned subsidiary company of DOCOMO interTouch.
