Polycom KIRK Wireless Server 8000 now available in Australia

DECT wireless telephony for small to very large businesses

Melbourne, October 1, 2009 – Wavelink Communications, a value added distributor of business IP telephony and wireless solutions, i s now offering the Polycom DECT KIRK Wireless Server 8000 (KWS 8000) to Australian businesses.

The Polycom KWS 8000 system is designed for businesses that need wireless telephony extensions covering a large geographical area, multiple locations or need t o equip a large number of mobile employees with DECT phones.

The solution is very flexible and scalable and its analogue interface ensures that the KWS 8000 is able to provide wireless extensions to any legacy PABX.

The Polycom KWS 8000 is modular and can be expanded to up to 8 cabinets with 64 card slots, permitting numerous DECT base station and analogue card combinations to produce a wireless solution customised to match the exact requirements of any organisation.

It can be configured to meet the n eeds of small and medium -sized businesses as well as very large enterprises and is also an ideal add -on solution that can grow with an organisation. A typical small configuration might be 6 DECT base stations with 12 wireless handsets, while a large configuration could be 256 DECT bases and 640 wireless handsets.

The KWS 8000 system has a flexible graphical user interface management program, which provides a range of service facilities such as e -mail reports and analysing tools to ensure a smooth running system and high return on investment by reducing the need for on -site visits.

Features and benefits of the Polycom KWS 8000 include:

- excellent voice quality for clearer communication
- low power consumption for a greener environment and cost reduc tions
- open messaging interface for integration with other messaging platforms such as nursecall systems, alarms etc.
- hot plug for easy replacement of interface cards while system is running
- CLIP for overview and access to caller IDs
- improved responsiveness and productivity of mobile workers
- secure voice communications across all enterprise environments.
