

COMPLETE YOUR DIGITAL TRANSFORMATION WITH VERSITY AND SAVE

Maximise your communication investment and empower your workforce by upgrading to Spectralink Versity smartphones.

Upgrading from legacy DECT or Wi-Fi phones to Versity supports the delivery of safer, sustainable, and higher quality care. Versity allows the care team to use one device for voice communication, care/medical records, nurse call and alerting systems; providing the decision support and tools needed to ensure best practice is followed.

Benefits of Versity:

-  Purpose-built for demanding Health and Aged Care environments.
-  Leading application integration that enables notification, documentation, and communication all from one device.
-  Swappable batteries for 24/7 operation.
